

n8n

Status	Production
Supported distro	CentOS 8

This role deploys the **n8n** workflow manager.

Here's a sample configuration

```
n8n_src_ip:
  - 10.29.1.14 # Access only for the rev proxy
n8n_public_url: https://workflow.example.org/
```

And a sample reverse proxy configuration, using the nginx role

```
nginx_vhosts:
  # n8n
  - name: workflow.example.org
    proxy:
      backend: http://n8n.fws.fr:8021
      allowed_methods: [GET, HEAD, POST, OPTIONS, PUT, DELETE, PATCH]
```
